PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience in Android application development using Kotlin and Java, along with AI/ML model training and deployment. Skilled in building scalable mobile applications with RESTful APIs, Firebase, push notifications, and MVVM architecture. Also experienced in web development and currently learning Flutter for cross-platform development.

EDUCATION

B.Sc. in Computer Science and Engineering 2021–2025
East West University, Dhaka
Major: Software Engineering
Thesis: SignBangla: Real-Time Bangla Sign Language Recognition System

TECHNICAL SKILLS

Languages: Java, Kotlin, Python, C, C++
Mobile: Android SDK, Jetpack Compose, XML
Architecture: MVVM, Clean Architecture
Backend: RESTful APIs, JSON, Retrofit
AI/ML: LSTM, CNN, Model Training, TensorflowLite, MediaPipe
Web: HTML, CSS, JavaScript, PHP
Cloud/DB: Firebase, MySQL, SQLite, MongoDB
Tools: Android Studio, Git, GitHub, Apache Server

PROJECTS

SignBangla — Real-Time Sign Language Recognition

- Developed Android app for real-time Bangla sign recognition and sentence generation.
- Implemented LSTM/CNN models with MediaPipe-based feature extraction for real-time prediction.
- Integrated trained ML model into mobile application for gesture-to-text communication.

SystemX — Smartphone Performance Monitoring

- Android app for real-time monitoring of CPU, RAM, battery, storage, and network usage.
- Implemented live data visualization and system-level data processing for performance analysis.

MessManager — Expense & Meal Management View Project

- Multi-user Android app with role-based access and Firebase synchronization with SQLite offline support.
- Implemented push notifications (FCM) and automated expense calculation system.

QuizHero — Web-Based Quiz Platform View Project

- Full-stack quiz platform with authentication, role-based access, auto-grading, and leaderboard system.
- Developed using HTML, CSS, JavaScript, PHP, and MySQL with secure data handling.

EXPERIENCE

Android Developer (Project-Based) 2023–Present

- Developed apps using Kotlin, Java, Android SDK, Firebase, REST APIs, and SQLite.
- Applied MVVM architecture and integrated backend services.

ACHIEVEMENTS

First Runner-up — Network War Competition

LANGUAGES

Bengali (Native), **English** (Proficient)
